SUMMARY

Graduated as Master of Science in Information Engineering Technology at Ghent University after an exchange at Uppsala University, Sweden. This experience has broadened my horizon and triggered me to complete an international traineeship at the IT Class of ING. During this year I've learned a lot of hard as well as soft skills. Gaining professional experience as DevOps, Data Scientist, Site Reliability Engineer and Data Engineer in a challenging but supportive environment. Currently, I am enrolled at Ghent University as a Teaching Assistant combined with a Ph.D. research within the field of cybersecurity. I would describe myself as a positive, determined and motivated team player, that isn't afraid of getting out of his comfort zone. Looking forward to help creating a better world with innovative technologies.

WORK EXPERIENCE

Sep 2018 – Aug 2019 **IT Class Trainee**
ING – Amsterdam, Netherlands

Summer 2017 **Software Engineer Intern**
Showpad – Gent, Belgium

EDUCATION

Sep 2019 - ... **PhD Candidate Information Engineering Technology**
Ghent University – Ghent, Belgium
Research Title: "Adaptive Data Processing for Cybersecurity Applications"

Spring 2018 **Erasmus+ exchange**
Uppsala University – Sweden
Master Thesis: "Monitoring Financial Transactions: Efficient Algorithms for Streaming Data"

2017 – 2018 **MSc in Information Engineering Technology – Cum laude**
Ghent University - Belgium

2014 – 2017 **BSc in Information Engineering Technology – Cum laude**
Ghent University - Belgium
